

Update for the Board – January 4th, 2023

Opioid Product Registration Fee Program (OPRFP)

- Reporting for the 2022 calendar year has opened.
- Manufacturers and wholesalers licensed in Minnesota must report all opiate distributions to entities located in Minnesota that administer or dispense medications by March 1st, 2023.
- Submissions received after March 1, 2022 will be considered late and subject to an administrative penalty of \$500 per day.
- If a manufacturer or wholesaler has no qualifying distributions to report, they must submit a zero-report indicating as such or have an approved exemption on file with the program.
- Staff will be sending reminder emails to encourage on-time uploads between now and March 1st.

Prescription Monitoring Program (PMP)

- The interactive, Tableau quarterly data dashboard is live for Q3 2022. We expect Q4 2022 data to soon be available on the dashboard as well.
- The PMP website is migrating to be hosted under the Board of Pharmacy's website. This is expected to be completed sometime early this year.

Grant Funding and Activities

PMP Gateway

- The state-wide Gateway license is renewed through at least September 2023 thanks to additional funding through the MDH OD2A grant.
- Since September 9, 2020 when the initial notice regarding the statewide license for PMP Gateway was sent, 272 entities have been reviewed and approved by the program for access. Of note, an entity may range from one prescriber or pharmacist to hundreds, if not thousands.

Inter-Jurisdictional Data Sharing

- The Board continues to utilize the NABP PMP InterConnect hub for all queries to other states and jurisdictions.
- The MN PMP is actively sharing with 43 jurisdictions, including Puerto Rico and the Military Health System.

Respectfully Submitted

Brock Reed, Pharm.D.

Controlled Substance Reporting Section Director
